

Nagiseti Pranathi

+91 6305534277 — pranathisiri05@gmail.com — LinkedIn — GitHub

Education

Shri Vishnu Engineering College for Women, Bhimavaram
B.Tech in Computer Science — CGPA: 9.52

2023 – 2027 (Expected)

Skills

Programming Languages: C, Python, Java, JavaScript, SQL

Web Development: HTML, CSS, React.js, Node.js, Express.js, Flask, PHP, MySQL

Computer Science Fundamentals: Data Structures Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Developer Tools & Platforms: Git/GitHub, Firebase, Postman, VS Code, Jupyter Notebook, Google Colab, XAMPP

Experience

GDGoC Organizer – Google Developer Groups (GDG)

Aug 2025 – Present

OnCampus, Shri Vishnu Engineering College for Women

- Led the execution of technical workshops, hackathons, and innovation campaigns for **800+ students**, promoting hands-on learning in Data Structures, Web Development, and AI/ML.
- Collaborated with **GDG India** to organize large-scale technical events, streamline coordination processes, and increase student participation in developer-focused initiatives.

Smart Interviews – DSA Mentor

Jan 2025 – Present

- Selected as **one of 10 mentors** (out of 150 applicants) to lead and guide a cohort of 200+ students.
- Delivered mentorship in **Data Structures and Algorithms** including recursion, graphs, and dynamic programming.
- Conducted **live coding sessions, mock interviews, and contest discussions** to enhance problem solving accuracy.

Projects

MockMate AI

[Ongoing]

- Building a full stack AI mock interview platform with secure JWT based authentication.
- Integrating Gemini API for dynamic, role based question generation.
- Implementing NLP based rubric scoring for automated answer evaluation.
- Supporting text and voice-based interview modes with speech-to-text processing.

Poultry Detect

[GitHub Repo]

- Built an end to end deep learning web application to classify poultry diseases using transfer learning with **ResNet50**.
- Trained and fine tuned the model on the Chicken Disease Kaggle dataset with structured train, validation, test split, achieving 94.4% validation accuracy and 91% test accuracy.
- Developed a Flask based backend to load the trained model and perform real-time predictions via REST API.

Online Payment Fraud Detection

[GitHub Repo]

- A machine learning model to identify fraudulent transactions in online payments. Used classification algorithms to improve detection accuracy and reduce false alerts.
- Building ML model detecting online fraud using Logistic Regression, Decision Tree, Random Forest .
- Expected to reduced false positives by 15% with SMOTE .

JobSprint

[GitHub Repo]

- JobSprint aims to revolutionize the job search experience by becoming the ultimate one-stop destination for job seekers.
- Aggregates 1000+ job listings via APIs (Adzuna, Remote, Arbeitnow).
- Built PHP admin panel, streamlined job updates by 60%.

Achievements & Certifications

- Awarded **Codess.Cafe** Mentorship among 750+ applicants, leveraging mentorship for skill development in the competitive tech landscape.
- Ranked **196** out of **40,986** participants in a **Smart Coder** Program conducted by SmartInterviews.
- Ranked in the **top 3.23%** on **LeetCode** with 1800+ contest rating .
- **CodeChef**: 1492 (Div 3), **GFG**: 1577 (Rank 9/3050)
- Designed and deployed **InstaInvites** - a template based event invitation web app with WhatsApp API integration, improving invite generation efficiency by 40%.
- Built and deployed a **HostelEase** full stack hostel management system with QR-based attendance, real-time database integration (Firestore), and AI-powered automation features.
- Secured **2nd place** in a college-level coding competition among **176** students (*July 2024*) [Certificate].
- Worked as an AIML intern at SmartBridge for 2 Months [Certificate].
- **Diamond Certificate** as a Smart Coder from **Smart Interviews** for excellence in coding and problem-solving skills.
